Typescript, Javascript, NextJS, React, React Native, Redux, Storybook, Styled-components, Node.js, Express, CSS, HTML5, Git, HTML, MongoDB, Mongoose, SQL, Postgresql, AWS

A passionate frontend developer, I specialise in creating responsive, data-driven web apps using React and TypeScript. I champion projects from inception to completion, going the extra mile to meet client expectations. I prioritise efficient software development processes, teaching colleagues UX/UI design and Figma, which enhances design quality, fosters collaboration, and expedites client feedback. I compassionately support, manage, and mentor colleagues, bringing extensive experience in direct client interactions. I develop projects for charity in my spare time.

Freelancing, Volunteering and ongoing projects, January 2023 - Present
      Sounds Super Podcasts, soundssuper.co. I designed, built, deployed and now
      maintain Sounds Super's website. React, TypeScript, TailwindCss and AWS hosting.
      Ideals Charity, ideals.freddiegroom.com, I redesigned and built the website for Ideals
      Disaster Relief Charity. I used React, NextJS, TypeScript, Styled-Components, Strapi
      and AWS hosting. This

Employment
Associate Developer, Decision Technology Ltd, *Mar 2019 — Jan 2023*, London UK
Built product variants to capture behavioural marketing insights. Contributed throughout the software development lifecycle on legacy and greenfield projects.
- Independently and within Teams delivered numerous experiments with React, TypeScript, Redux, and Storybook.
- Consistently worked extra hours if client requirements were extended to meet deadlines.
- Championed software design process, optimised workflow, reduced project duration and led company-wide and individual training on Figma.
- Mentored junior developers cultivating a friendly and supportive team environment
- Managed Python automation scripts on Amazon EC2.

Mentor, Bright Network Coding Bootcamp, *Mar 2021 - May 2021,* London UK
- Supported graduates taking a remote software engineering boot camp.
- Coached mentees through technical questions and how to deliver projects.
- Received overwhelmingly positive feedback from course management and attendees.

Education:
Bachelor of Science in Computer Science, University of London, *2023 - present*
Full Stack Development Bootcamp, Red Academy, *Apr 2018 — Oct 2018,* London UK
Delivered two MVP apps for startup clients. A wordpress website and a react native mobile app.

Other Work:
Senior Crossfit Coach, Crossfit Vauxhall London, *Mar 2012 - Mar 2019*
British School of Osteopathy, *2012 — 2016,* London UK
